- Computers & Computer Systems

OTHER EXPERIENCE -----

Camp Counsellor	Event Coordinator
Camp Bus Captain	Teaching Assistant
Residence Amb.	Student Mentor

INTERESTS -----

UI/UX Design	Bullet Journaling
Badminton	Embroidery
Calligraphy	Painting

EXPERIENCE -----

FULL STACK WEB DEVELOPER, Polar

Remote | Sept. - Dec. 2020

- Expanded functionality in **Django** admin using **Python** and database migration scripts, allowing clients to add custom fields and grant special permissions
- Improved usability of web product in **JavaScript (React, Redux) & CSS** by creating dashboard features to simplify workflow for power users
- Traced and debugged issues using **VSCode** and Chrome **DevTools**
- Created tests using **Unittest** to uphold **75%** code coverage on **Jenkins**

iOS COMPUTER ENGINEER, Flybits Inc.

Toronto, ON | Jan. - Apr. 2020

- Developed SDK features in **Swift**, including image caching on main feed and handling JWTs in HTTP requests for faster and safer performance
- Implemented custom features on internal test app using Swift and Xcode **Simulator**, such as clearing iCloud Keychain to broaden testing capabilities
- Prepared and manually executed detailed test plans using Xcode **Instruments**, **Charles**, and exploratory testing to verify SDK release quality

FULL STACK WEB DEVELOPER, Properly Inc.

Toronto, ON | May - Aug. 2019

- Implemented and tested back-end systems with **AWS Serverless** infrastructure (**Lambda, S3, DynamoDB, CloudFormation**)
- Developed front-end of active listing site with **JavaScript (React, Redux) & CSS (Bootstrap, Flexbox)**, and set up **Google Analytics** website behaviour tracking
- Fetched data on problematic homes and displayed alert on operations portal by building end-to-end **Python** system, reducing operations bottleneck by **1h/day**
- Pulled MLS data using **RETS** framework in Python to power listing site

SOFTWARE DEVELOPER, BAML

Toronto, ON | Sept. - Dec. 2018

- Redesigned data retrieval in front-office trading system using **REST** endpoints created in **Java**, improving database security
- Formulated complex **SQL** parameterized queries and procedures to return client activity data from **MSSQL** database to populate reports
- Created GUI in **C#** using **WinForms** and **JasperReports** with custom options, results filtering, and Excel exportation options

PROJECTS -----

PERSONAL WEBSITE, jennyguan.codes

Sept. 2020

- Developed a **React** web app using **JavaScript** and **HTML**
- Designed a responsive and user-friendly interface using **CSS** and **Flexbox** layout

QUADRIS, UWaterloo CS246 Final Project

July 2018

- Developed a Tetris-like tile-matching game in a team of 3 using **C++**
- Handled block creation and levels with varying obstacles and block rarities
- Tested all commands and cases including block requests, queue, points, & reset

PREDICTIVE BOT, KPMG LLP.

Jan. - Apr. 2018

- Organized and facilitated Sky AI Team meeting to align vision and set task goals for a ML project to predict NBA game outcomes with a binary classifier
- Experimented with **Beautiful Soup** package in **Python** to web scrape historical game data into a database as input for algorithm
